## Summary

I am a full-stack web developer and social media marketing & sales automation genius. I create websites, web apps, landing pages, funnels, e-commerce websites using various software and coding skills, and run PPC and lead ads on Facebook, Instagram, LinkedIn, Google, and Bing.

As a tech guy, I mostly focus on automation and creates perfect follow-up automation for my client's prospects. I use various Facebook Messenger bots, email follow-up sequences, in-person SMS automation services to automate my client's sales process. These methods helped my clients generate more leads and conversions.
